

# Casa de Piedra

## Espuma de Piedra Blanc de Noir

### THE FACTS

COUNTRY: Mexico

REGION: Baja California

### THE STORY

Casa de Piedra was born as a family-inspired project in 1997. The driving idea is and always has been; obtain wines that are characterized by their “origin”. In our preparations we have sought to highlight the elements that make up the place where the grapes are grown.

Since we started this unique adventure, 26 vintages have passed through the house's mills. So far, we have released 24 vintages that try to reflect an oenological sensitivity subject to context. Always maintaining a scale that allows us to take care of each bottle and thus imprint the personality of the terroir as much as possible.

Our commitment is to convey the flavors and experiences of the land where we live, through the wines we offer.
